

KEEPING OUR WORKPLACE SAFE: Backdoor Safety and Outdoor Lighting.

At MSI, keeping our employees safe is very important. This period, we are focusing Backdoor Safety and Outdoor lighting. These steps help protect our team and keep our restaurants safe.

BACKDOOR SAFETY: DO NOT USE AFTER DARK

The safety of our team member is our top priority. To reduce security risks, the backdoor should not be used after dark. Using the backdoor at night can increase the risk of unauthorized entry and safety concerns. Please follow these rules:

- Use the main entrance after dark.
- Keep the backdoor locked during evening hours.
- Report anything suspicious near the backdoor right away.
- Do not prop the backdoor open for any reason.
- Do quick checks to make sure the backdoor stays locked.
- Never open the backdoor for strangers-direct them to the front entrance.

OUTDOOR LIGHTING: KEEPING THE PREMISES SAFE

Good lighting helps prevent accidents and discourages criminal activity. With summer approaching it is important to keep outdoor lighting working properly.

- Check outdoor lights regularly to make sure they work.
- Replace burned-out bulbs right away.
- Make sure entrances, parking areas, and walkways are well-lit.
- Check lighting near the backdoor and dumpster area.
- Report broken lights immediately to a manager.
- Do a quick "night walk" check weekly to spot dark areas.

By following these tips, we can help protect our workplace for everyone. If you have any safety concerns, please talk to a manager right away. Thank you for making safety a priority. Let's work together to make Period 4 scam-free and accident-free!

STAY SAFE, STAY SMART
